

CP9xx Touch Control Panel

The **CP9xx Touch Control Panel** offers an all-in-one solution that can control and monitor numerous aspects of the operating room environment.

Due to the robust surface and design, there are no limits to the application scenarios. The Bender CP9xx comes in three different sizes — 7", 15.6", and 24".

Benefits

- **Improve staff satisfaction and reduce training time** by standardizing user interfaces regardless of equipment providers.
- **Free up wall space and reduce installation time** by eliminating the need for discreet manufacture alarm/control indicators.
- **Flexible and future proof design** with easily customizable touch interface that permits new equipment to be added and removed as needed.
- **Improve room hygiene** by offering a glass surface made specifically for the harsh cleaning environments of operating rooms.

Easily integrates with...

- Operating room light controls
- Medical isolated power systems
- Room lighting
- UPS system status
- Ventilation and air conditioning systems
- Thermostats
- Clocks and timers
- LIM remote indicators
- Medical gas alarms

Display. Alert. Control.
