

The next generation of smart Level II AC charge controllers

CC613 charge controller

- Dynamic load management (DLM)
- Integrated CCID fault current detection
- Integrated emergency opener
- Regular software updates
- Multiple I/O's for various functions
- Ethernet interface

Bender charging technology:

- Smart charge controllers
- Future-proof charging infrastructure
- Compatible with many power meters
- Dynamic load management (DLM)
- Economic efficiency, availability and safety combined

CC613 charge controller:

- Integrated dynamic load management
- Integrated Powerline Communication (PLC) in acc. with ISO 15118
- Integrated emergency opener
- Smart-grid-capable through OCPP 1.5 and 1.6 (JSON and SOAP)
- Integrated 6 mA DC fault current detection/monitoring and full CCID functionality
- Ethernet interface and integrated 4G modem

Bender EV and EVSE solutions:

Standard-compliant solutions from the charging station to the electric vehicle

- Vehicle sensors (insulation monitoring/failure)
- Charging technology/charge controllers
- Ground-fault sensing equipment (AC and DC charging)
